Finding Printers – Zebra Card SDK for Series 3 Printers – C#

This sample application demonstrates how to use the ZXP Series 3 SDK to search for ZXP Series 3 printers connected over USB and Ethernet.

Note: Installation of both the ZBRPrinter.dll and ZBRGraphics.dll SDKs is required prior to compiling and running this sample application.

This is a Windows Desktop application developed in C# with Microsoft Visual Studio 2017 for .NET Framework v2.0.

Note: This application is provided AS-IS, for example purposes only.

## Running the Sample Application

Follow these steps to launch and use the sample application.

1. Open or double-click the sample application (.sln).

    The solution opens in Microsoft Visual Studio 2017.

2. Press **F5** to run the sample application.

    The following dialog appears.

3. Select the **Connection** type (USB or Ethernet), then select the ZXP 3 printer from the Printers dropdown menu.
4. Select either **Single Sided** or **Dual Sided** printing option.
5. Click **Start Printer Job** to begin printing.
